

Contents

1	Introduction	1
1.1	Evolution of Reinforcement Learning	1
1.1.1	Reinforcement Learning Basics	2
1.1.2	Multi-agent Reinforcement Learning	6
1.1.3	Inverse Reinforcement Learning	6
1.1.4	Meta Reinforcement Learning	8
1.1.5	Hierarchical Reinforcement Learning	9
1.1.6	Multi-Task Reinforcement Learning	10
1.2	Deep Reinforcement Learning	10
1.3	Applications of Reinforcement Learning	11
1.4	Advanced Topics in Deep Reinforcement Learning	11
1.5	Summary	11
1.6	Bibliographic Notes	11
2	Mathematics in Deep Reinforcement Learning	13
2.1	Reinforcement Learning Foundations	13
2.2	Deep Learning Foundations	13
2.3	Deep Reinforcement Learning Foundations	13
2.4	Performance Evaluations	13
2.4.1	Offline Performance Metrics	13
2.4.2	Online Performance Metrics	13
2.4.3	A/B Testing	13
2.4.4	Interleaving	13
3	Deep Reinforcement Learning Models	15
3.1	General Functionalities of Deep Models	15
3.1.1	Policy Approximation Based	15
3.1.2	Value Function Approximation Based	15
3.2	Deep Embeddings	15
3.3	Transformers in Reinforcement Learning Models	15
3.4	CNN-based Reinforcement Learning Models	15

3.5	RNN-based Reinforcement Learning Models	15
3.6	Hybrid Deep Reinforcement Learning Models	15
3.7	Hybrid Reinforcement Learning Models	15
3.8	Advanced Network Components	15
3.8.1	Attention	15
4	Emperical Deep Reinforcement Learning Systems	17
4.1	DRL In Robotics	17
4.2	DRL In Commerce	17
4.3	DRL In Medications	17
4.4	DRL In Education	17
4.5	DRL In Civilization	17
4.6	DRL In Simulations	17
5	Performance Evaluations	19
5.0.1	Offline Performance Metrics	19
5.0.2	Online Performance Metrics	19
5.0.3	A/B Testing	19
5.0.4	Interleaving	19
6	Advanced Topics	21
6.1	Memorization	21
6.2	Alignment of Target Network	21
6.3	Policy Drift and the Solutions	21
6.4	Sociality and Trust	21
6.5	Attack Resistance	21
6.6	Privacy Preservation	21
6.7	Personalization	21
7	Empericcal Researches Ongoing	23
7.1	Adoptations of Neuroscience	23
7.2	Future of Deep Reinforcement Learning	23
A	Appendix	25
A.1	Math Appendix	25
	Glossary	29
